8. Company Information

E-Silk Route Ventures (Pvt) Ltd was incorporated to establish strategic trade routes in the modern business world, exporting superior-quality spices, tea, herbs, coconut products, and other agricultural commodities produced in Sri Lanka while uplifting the livelihoods of our small-scale farmer communities. Our integrated supply-chain model spans from

contracted smallholder farms to in-house factory processing under BRCGS, FSSC 22000, HACCP, ISO 22000 and GMP, with direct trade lanes into the UK, USA, Australia, and the UAE.

Our Factories

Our factories use safe and effective manufacturing processes built around cellular manufacturing principles, enabling a wide variety of products to be strategically produced with minimal slack time and the highest throughput. Our facilities also provide valuable employment opportunities to the surrounding rural areas, including the spouses of our farmer partners.

Our Farmers

Our farmers — the upstream of our supply chain — belong to a challenged socio-economic class long masked by intermediaries. Through direct trade, we provide the best possible price for produce from our micro, small, and medium-scale farmers, and we capture provenance at the farm level for full traceability back to the grove.

9. Sustainability & CSR

Backward Value Transfer (BVT)

Our BVT initiative ensures that the farmer benefits the most from each transaction by transferring the majority of the realised margin back to the producer at source.

Silk Social Index (SSI)

A proprietary measure of brand impact at the grass-root farmer-community level, attached to every commercial transaction so customers can quantify the social good their purchase creates.

Green Initiative

Year-on-year green-growth pledge implemented across the organisation through:

- Re-use of cartons and paper
- Preference for solar dryers over fossil-fuel-fired dryers
- Treatment of organic solid waste and re-application as plantation fertiliser
- Treatment of wastewater and diversion to plantation irrigation
- Biodegradable / compostable primary-packaging options on request

10. Supply Chain Management

Management of supply chains on behalf of customers — covering product, packaging, certification, logistics, and delivery — so our customers can focus on selling.

Hassle-free International Trade (H-fIT)

Source products from regions where we are present, without being involved in the import/export process, from the comfort of your office. We export from origin, import into your local through our registered entities, and deliver to your warehouse.
